Executive Summary

Investigation Overview

Gravitas Investigations conducted a multi-phase compliance investigation into Ohio dispensaries' adherence to the THC potency limits established under Ohio Senate Bill 56 (SB 56), codified at Ohio Revised Code § 3796.06(E), which caps the potency of any cannabis extract product offered for sale at no more than 70% THC. An evidentiary threshold exceeding 77% THC was applied as the primary benchmark for the in-person audit phase, accounting for allowable testing variance.

The investigation was conducted in three phases between April 4, 2026, and May 21, 2026, encompassing in-person undercover visits to 30 dispensary locations, online menu reviews of all 30 audited locations, a secondary online review for products in the 70.1–77% THC range, and a follow-up compliance sweep of all 210 active Ohio dispensary locations. The findings across all phases are consistent and unambiguous: Ohio dispensaries are operating in systematic, industry-wide non-compliance with the statutory THC potency limit.

Phase I — In-Person Audit Findings (30 Locations)

Metric	Finding
Locations Investigated	30
Locations with Violation (THC > 77%)	30 of 30 (100%)
Locations Below Threshold	0 of 30 (0%)
THC Range of Purchased Products	79.9% – 93.6%
Products Purchased	30 (one per location)

Every one of the 30 dispensary locations visited by investigators offered for sale at least one vaporizer product with a Total THC concentration exceeding 77%, constituting a violation of the applicable statutory threshold. Products were purchased at retail, and THC content was verified through the product label and state-required certificate of analysis (COA) information.

Investigators also documented compliance responses from dispensary associates at 26 of 30 locations. The predominant response was that the THC potency law "does not apply to licensed dispensaries" — a legally inaccurate characterization. Several associates stated the law only affects hemp shops, smoke shops, or unregulated retailers. Only one location (Amplify) demonstrated an accurate understanding of the law and stated they follow all applicable rules. But despite the understanding of the law by the associate, a product in violation of the limit was still sold to the investigators.

Phase II — Online Menu Review Findings

Metric	Above 77% THC	In 70–77% THC Range
Locations Reviewed	30 of 30	30 of 30

Locations with Non-Compliant Listings	30 of 30 (100%)	30 of 30 (100%)
Total Vaporizer Products Found	1,585	1,574
Total Concentrate Products Found	85	374
Grand Total Non-Compliant Products	1,670	2,699 (est.)

A pre-investigation online menu review of all 30 audited locations identified a combined total of **1,670 product listings advertising THC concentrations above 77%** (1,585 vaporizer products and 85 concentrate products). A secondary review conducted between April 16–20, 2026 identified an additional **2,699 product listings in the 70.1%–77% THC range**, all of which exceed the 70% statutory cap established under ORC § 3796.06(E). In aggregate, the online menus of the 30 audited locations contained at least **4,369 non-compliant product listings** at the time of review.

The 30 audited locations are owned or controlled by entities that collectively operate **149 of Ohio's 210 active dispensaries (71.9%)**, indicating that the non-compliance documented in this investigation is representative of the industry as a whole.

Phase III — Follow-Up Compliance Sweep (210 Locations)

Metric	Finding
Total Dispensaries Swept	210
Locations with Non-Compliant Listings (Fail)	210 of 210 (100%)
Locations Fully Compliant (Pass)	0 of 210 (0%)
THC Range Documented	72.2% – 94.8%
Average THC % of Highest-Potency Listed Product	89.7%
Sweep Conducted	May 18–21, 2026
Elapsed Time Since Law Took Effect	Approximately 7 weeks

Approximately seven weeks after the effective date of Ohio's THC potency law, investigators conducted a targeted follow-up sweep of all 210 active Ohio dispensary websites. The objective was to determine whether dispensaries had come into compliance with the statutory limit in the intervening period. Investigators visited each dispensary's publicly accessible online menu, identified the highest-potency product listed, and captured a timestamped screenshot for evidentiary documentation.

Every single one of the 210 dispensaries reviewed was found to be in violation, actively advertising at least one product with a THC concentration exceeding the statutory limit. The average highest-potency product found across all 210 locations was 89.7% THC — nearly 20 percentage points above the 70% statutory cap. These findings confirm that non-compliance is not isolated to the 30 locations audited in Phase I but is an industry-wide condition affecting every active Ohio dispensary.

Key Findings & Conclusions

1. Universal Non-Compliance

Across all three phases of this investigation — in-person audits, online menu reviews, and the follow-up sweep — not a single Ohio dispensary was found to be in compliance with the THC potency limits established under ORC § 3796.06(E). The violation rate is 100% across 210 dispensary locations.

2. Systematic Misrepresentation of the Law

Dispensary associates at 25 of 26 locations that provided a compliance response stated, in substance, that the THC potency law does not apply to licensed dispensaries. This characterization is legally inaccurate. The statute applies to all cannabis extract products offered for sale in Ohio, regardless of the seller's license type.

3. Continued Non-Compliance Seven Weeks After Effective Date

The follow-up sweep conducted approximately seven weeks after the law's effective date found zero improvement in compliance. All 210 dispensaries continued to advertise products well above the statutory limit, with an average highest-potency product of 89.7% THC.

4. Scale of Non-Compliant Advertising

The 30 audited locations alone had a combined 4,369+ non-compliant product listings on their online menus at the time of review — 1,670 products above 77% THC and 2,699 additional products in the 70.1–77% THC range, all of which exceed the 70% statutory cap.

5. Industry-Wide Scope

The 30 audited locations are owned by entities controlling 71.9% of all active Ohio dispensaries, and the follow-up sweep confirmed violations at all 210 active locations. The non-compliance documented in this investigation is not isolated — it is a defining characteristic of the Ohio dispensary industry as currently operating.

The complete evidentiary record — including investigator reports, product label photographs, receipt documentation, online menu screenshots, and certificate of analysis data — is contained in the sections that follow or in Gravitass' case files.

EXECUTIVE SUMMARY (Phase 1)

This report documents the results of an undercover compliance investigation conducted on Saturday, April 4, 2026, targeting thirty (30) Ohio-licensed marijuana dispensaries across six geographic zones: Cleveland, Akron, Canton, Cincinnati, Southwest Ohio, and Columbus. The investigation was designed to determine whether licensed dispensaries were selling vaporizer and concentrate products exceeding 70% THC established under Ohio law, and to document how dispensary staff characterized the applicability of that law to their operations.

Investigators conducted undercover in-person purchases at each location, requesting the highest-potency sativa vaporizer or cartridge available. Following each purchase, investigators asked dispensary associates how recent Ohio cannabis regulation changes had affected their operations. Investigators also conducted pre-visit internet searches of each dispensary's online menu to document the volume of products exceeding 77% THC available for sale prior to the in-person visit.

Of the 30 locations investigated, 30 (100%) resulted in the purchase of a vaporizer product with a Total THC concentration exceeding 77% THC, constituting a violation. Across all 30 locations, online menu searches documented hundreds of vaporizers and concentrate products exceeding 77% THC actively listed for sale on dispensary websites as of April 2, 2026.

A consistent pattern emerged in associate responses to compliance inquiries: the overwhelming majority of dispensary staff stated that the new Ohio cannabis regulations did not apply to their location because they are licensed by the state, hold a Division of Cannabis Control license, or are a medical dispensary. Several associates attributed the law's impact solely to hemp shops, smoke shops, or unregulated retailers. Only one location (Amplify, Columbus) indicated active compliance efforts, stating they 'immediately adapt' to new Ohio rules. One location (Greenlight Dispensary, Columbus) offered a factually inaccurate explanation, claiming Ohio measures plant weight when wet rather than dry.

METHODOLOGY

Online Pre-Investigation (April 2, 2026): Prior to in-person visits, investigators conducted internet searches of each dispensary's publicly accessible online menu. Investigators filtered or sorted products by THC potency and documented all vaporizer and concentrate products listed at or above 77% THC. Screenshots were captured as evidence. For several locations, PDF compilations of screenshots were prepared.

In-Person Undercover Purchases (April 4, 2026): Investigators arrived at each dispensary location, identified themselves as customers seeking the highest-potency sativa vaporizer or cartridge available, citing a high tolerance and/or pain management needs. Investigators completed a purchase at each location. Audio recordings were made at most locations; where technical issues prevented recording, this is noted in the individual location report. Photographs were taken of the exterior, purchased product, product label, and receipt.

THC Threshold Calculation: The 77% THC threshold was applied to the Total THC figure as stated on the product's Product Facts label. For 0.5g products, the threshold is 385 mg ($77\% \times 500 \text{ mg}$). For 1g products, the threshold is 770 mg ($77\% \times 1,000 \text{ mg}$). For 0.85g products (Luster Pods), the threshold is 654.5 mg ($77\% \times 850 \text{ mg}$). For 0.3g products, the threshold is 231 mg ($77\% \times 300 \text{ mg}$). Where the label stated a percentage directly, that percentage was used. Where only milligrams were stated, the percentage was calculated by dividing Total THC mg by net weight in mg.

Compliance Response Documentation: Following each purchase, investigators asked dispensary associates how recent Ohio cannabis regulation changes had affected their operations. Associate responses were

documented in field notes and, where available, in audio recordings. Transcriptions of audio recordings are included in the individual location reports where substantive compliance-related dialogue was captured.

Investigators: Nolan F. (Cleveland, Akron, Canton, and Monroe zones); Sheila W. (Cincinnati zone); Angel M. (Southwest Ohio/Cincinnati zone); Timothy B. (Columbus zone). Validation: Adam V.

COMPLIANCE RESPONSE SUMMARY

The following table summarizes the compliance response given by dispensary associates at each location when asked how recent Ohio cannabis regulation changes had affected their operations. Responses are categorized by theme.

#	Location	Compliance Response
Licensed/Exempt — Does Not Apply to Us		
4	Terrasana Cannabis	Associate (Terrasana): 'It doesn't affect us. We're a licensed dispensary.'
15	Zen Leaf	Associate (Zen Leaf): Compliance response not separately documented; 'LICENSED BY DIVISION OF CANNABIS CONTROL' signage only.
16	The Botanist	Kyle (The Botanist): 'It affects all of the like smokeshops and non-regulated dispensaries more than us... as far as what we're able to sell there's not a lot of radical changes... there is also a variance allowance too.'
25	Theory Wellness	Shane (Theory Wellness): 'It had not affected them at all because of their license, that they are a medical dispensary as well, that the company is based in Boston and operates throughout the country.' Agreed with investigator's characterization of 'workaround.'
26	Herbal Wellness Center	Associate (Herbal Wellness Center): 'Has not affected them because they are a licensed dispensary.' Pointed to employee ID badge as justification.
28	Certified Dispensary	Associate (Certified Dispensary): 'They are licensed by the state, so they are good.' No further detail.
29	Pure Ohio Wellness	Associate (Pure Ohio Wellness): 'The law did not apply to them as they are licensed by the state.'
Only Affects Hemp/Smoke Shops		
1	Curaleaf	Michael (Curaleaf): 'It's already kind of in effect, I've seen a lot of places [affected]... it shouldn't affect you too much here.'
2	BEYOND / HELLO	Liz (BEYOND/HELLO): 'If you were smoking at a store that no longer exists or sells a product that was hemp and it wasn't cannabis... rec is still a thing, and med is still a thing.'
3	AYR Cannabis Dispensary	Associate (AYR): 'It doesn't really affect us. It's more for the hemp shops.'
7	Verilife	Associate (Verilife): 'It only affects little convenience stores and places like that and does not affect the dispensaries.'

8	Trulieve	Associate (Trulieve): 'It only affects little convenience stores and places like that and does not affect the dispensaries.'
9	RISE Cleveland	Kacey (RISE Cleveland): 'Yeah, usually it applies to like medical patients. Some of the percentages have changed, but I'm not really sure if that's went into effect yet... not that much [affects us].'
10	The Forest - Cincinnati	Associate (The Forest): 'It only affects little convenience stores and places like that and does not affect the dispensaries.'
11	Therapy Cannabis - Cleveland	Laquita (Therapy Cannabis): 'A lot of the dispensaries that are not medical are closed. That's the one thing for sure.'
12	The Landing Dispensary	Associate (The Landing, Berea): 'It doesn't really affect us. It's more for the hemp shops.'
13	FRX Elyria Craft Cannabis Dispensary	Erin (FRX Elyria): 'That's more so for medical from what I'm understanding.' Second employee: 'It's a lot of hemp derived products. So not stuff that we sell.'
14	Culture Cannabis	Davin (Culture Cannabis): 'Not us. Hemp shops.'
17	Ohio Cannabis Company	Christina (Ohio Cannabis Company): 'That's all for the synthetic. Not really with the dispensaries. More or less like your smoke shops.' Second employee: 'If anything it helped us because it's cutting out [unregulated] drinks, they can't get anywhere else.'
18	Klutch Cannabis	Jake (Klutch Cannabis): 'No, it doesn't affect us. If anything, it just brings new people in here that have been going to like gas stations and stuff like that.'
21	The Garden by KCG	Scott (The Garden): 'Does not affect us yet. It only affects smoke shops. It's only illegal in Ohio and you could go to Indiana to get it.'
23	Ascend Dispensary	Marcus (Ascend): 'The changes did not really affect the dispensary; it would only affect the consumer and the hole in the wall smoke shops that are not regulated... most of the things that changed were already illegal they just had to come out and say it.'
Actively Compliant		
30	Amplify	Associate (Amplify): 'They just follow the rules, stay compliant, and whenever a new rule or law comes down from Ohio, they immediately adapt to it and follow it.'
Inaccurate/Misleading Explanation		
27	Greenlight Dispensary	Associates (Greenlight Dispensary): 'Ohio measures the weight of the plant when it is wet and that is the only measurement taken, so when it is dry the THC level is compliant because it is not weighed when dry.' Both agreed with investigator's characterization of 'ignorance is bliss.'
Purchasing Limits Only		
6	Sunnyside	Associate (Sunnyside): 'Starting in September they will no longer be allowed to sell high THC items over 70%. They will be allowed to continue to sell current stock but cannot purchase new inventory above that threshold.'
19	Columbia Care	Nicky/Nichole Barnes (Columbia Care): 'As far as recreational goes, just put it in your trunk... the only thing that has changed with that is the amount. The medical side we are equal to rec now.'
20	Nectar	Alex (Nectar): Explained it was the 'purchasing limits for recreational.'

<i>No Response / Not Captured</i>		
5	Story Cannabis	No compliance response captured (audio not transcribed with substantive dialogue).
22	Zips Dispensary	Andrew (Zips): Investigator did not ask. Andrew voluntarily described product as '87% THC, which is pretty hard to find in Ohio.'
24	Bloom Cannabis	Kori (Bloom Cannabis): Investigator was unable to ask — customer line was long and employees were rushing customers through.

SUMMARY TABLE — ALL 30 LOCATIONS

Rove Live Resin Diamonds Kits listed at \$65-\$70 with THC ranging from 88-93%. Highest THC product observed: Rove PX Live Resin Diamonds Kit at 93.08% THC (\$70). Concentrates section included Certified Strawberry Diesel RSO Syringe (79.8% THC, 25% off), Certified Shady Lemons RSO Syringe (79% THC, 25% off), Butterfly Effect Hybrid RSO Syringe (77.46% THC), and Grassroots Hybrid RSO Syringe (77.33% THC, 20% off). Winning Brands promotional label applied to multiple products including Supply Blue Dream Cartridge (\$23.80, was \$28) and Supply Straw Cough Cartridge (\$34, was \$40).

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 2:04 PM the investigator arrived at Curaleaf located at 1220 Buchholzer Boulevard, Cuyahoga Falls, Ohio to conduct an in store purchase. An audio recording was taken

of the investigator entering the store. Upon entering the store, the investigator first spoke with a female employee at the check-in desk and was then directed to the back room. The investigator ordered the selected item from a kiosk and was subsequently assisted by a cashier who stated his name was "Michael." The investigator requested to purchase a Supply- Super 500 mg Lemon vape pen. The employee retrieved the requested item.

The investigator asked "Michael" "I heard, uh, there's been some regulation change lately with cannabis?" "Michael" responded that "Yeah, so they're (inaudible) like the percentage that you can get" and "for rec it's still the same amount it's (inaudible)." The investigator then asked, "So it doesn't really affect your store?" "Michael" responded "Not really. I mean like, we're basically, a (inaudible)." "Michael" also made general statements regarding potential changes to potency percentages. The investigator then asked, "Do they know when that's supposed to start?" "Michael" responded "It's already kind of in effect, I've seen a lot of places (inaudible)." He further stated "Yeah, so it shouldn't affect you too much here." The investigator then completed the purchase and exited the store. The audio recording was discontinued at 2:14 PM.

The only signage that was observed inside of the building related to regulation were signs that stated, "LICENSED BY DIVISION OF CANNABIS CONTROL". Due to loud music within the facility, portions of the audio recording were difficult to clearly discern. Photos of the purchased product and receipt were taken.

In-Person Results: The product that was purchased was a Supply- Super 500 mg Lemon vape pen. The packaging stated that the "Total THC: 403.52" or 80.704% after calculated. The packaging on the product also stated "MFG: 11/24/2025". At approximately 2:18 PM efforts were discontinued and the investigator departed the area.

Audio Recording

Audio File(s): NewRecording11.m4a

Audio Transcript Summary

The investigator entered Curaleaf and was checked in by a female employee at the front desk before being directed to the back room. The investigator used a kiosk to order and was assisted by a cashier named Michael. During the transaction, the investigator asked about recent cannabis regulation changes. Michael acknowledged that percentage changes were occurring, stating the regulations were 'already kind of in effect' and that he had 'seen a lot of places' affected. Michael indicated the changes were mostly affecting medical dispensaries and unlicensed smoke shops, and that it 'shouldn't affect you too much here.' After completing the purchase, the investigator exited at 2:14 PM and noted on the recording that Michael mentioned laws had changed recently but did not provide specific details about THC limits.

Notable Observations: Sixty-six (66) vaporizers and two (2) concentrates were listed on the website exceeding 77% THC. These findings are for investigative purposes; verification of exact THC content and product type may be required. Full screenshots and screen video recordings are available in the case management system.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 1:02 PM the investigator arrived at Beyond Hello located at 6891 Ridge Road, Parma, Ohio 44129 to conduct an in-store purchase. An audio recording was taken of the investigator entering the store. Upon entering the store, the investigator first spoke with a female employee at the check-in desk and was then directed to the back room. The investigator ordered the selected item from a kiosk and was subsequently assisted by a cashier who stated her name was "Liz." The investigator requested to purchase The Lab- Green Gem. The employee retrieved the requested item.

The investigator asked "Liz" "I've heard they've been changing the regulation lately. Have you heard anything about that?" "Liz" responded that "Yeah, um, if you were smoking at a store that no longer exists or sells a product that was hemp and it wasn't cannabis..." She further stated that "So rec is still a thing and med is still a thing but cannabis is a separate plant from the hemp plant. They're similar but they're two different plants." During this exchange, a nearby customer interjected into the conversation, which hindered the question and answer process. The investigator then completed the purchase and exited the store. The audio recording was discontinued at 1:12 PM.

The only signage that was observed inside of the building related to regulation were signs that stated, "LICENSED BY DIVISION OF CANNABIS CONTROL".

In-Person Results: Photos of the purchased product and receipt were taken. The product that was purchased was The Lab- Green Gem. The packaging stated "Total THC: 409.97 mg" or 81.994% after calculated. The packaging on the product also stated, "Manufactured Date: 12/5/2025". At approximately 1:13 PM efforts were discontinued and the investigator departed the area.

Audio Recording

Audio File(s): NewRecording10.m4a

Audio Transcript Summary

The recording opens with the investigator stating: 'Today is Saturday, April 4th, 2026. Time is 1:03 PM. I'm entering Beyond Hello at 6891 Ridge Road, Parma, Ohio, 44129.' The remainder of the recording captured ambient store audio. The substantive conversation with employee Liz regarding regulation

changes was captured but background noise and music significantly impaired transcription of the exchange.

Notable Observations: 58 vaporizers and 1 concentrate exceeding 77% THC threshold documented. 16 screenshots cataloged.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 12:20 PM the investigator arrived at AYR Dispensary located at 6555 Pearl Road, Parma Heights, Ohio 44130 to conduct an in store purchase. An audio recording was taken of the investigator entering the store. Upon entering the store, the investigator first spoke with a male employee at the check-in desk and was then directed to the back room. The investigator was assisted by a cashier who stated her name was "Safanna." The investigator requested to purchase an Old Granger Extracts- 1 gram vape. The employee retrieved the requested item.

The investigator asked "Safanna" "I heard Ohio was kinda changing some of the regulation lately". Due to loud music within the facility, the exact phrasing of the response was not clearly discernible from the recording; however, "Safanna" indicated that there were no changes affecting recreational sales, some

changes affecting medical, and that edible dosage changes are expected in September. The investigator then completed the purchase and exited the store. The audio recording was discontinued at 12:31 PM.

The only signage that was observed inside of the building related to regulation were signs that stated, "LICENSED BY DIVISION OF CANNABIS CONTROL". It should be noted that the address was incorrectly stated in the initial audio recording and later corrected in a second recording. Additionally, loud music within the interior of the facility reduced the overall audio quality.

In-Person Results: Photos of the purchased product and receipt were taken. The product that was purchased was an Old Granger Extracts- 1 gram vape. The packaging stated that the "Total THC: 914.3 mg" or 91.43% after calculated. The packaging on the product also stated, "Manufacture Date: 2/10/2026". At approximately 12:40 PM efforts were discontinued and the investigator departed the area.

Total Products > 77% THC	36

Notable Observations: Thirty-six (36) vaporizers and zero (0) concentrates were listed on the website exceeding 77% THC. The menu was filtered by potency high to low with THC range set to 77%-100%. All products observed were &Shine, RYTHM, and Good Green brand vaporizers, all listed at 20% off. These findings are for investigative purposes; verification of exact THC content and product type may be required.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 11:59 AM the investigator arrived at Terrasana Cannabis located at 11575 Brookpark Road, Parma, Ohio 44130 to conduct an in-store purchase. An audio recording was taken of the investigator entering the store. Upon entering the store, the investigator first spoke with a male employee at the check-in desk and was then directed to the back room. The investigator was assisted by a cashier who stated his name was "Adam." The investigator requested to purchase a Shine- Durban Poison vape pen 0.5 grams. The employee retrieved the requested item.

The investigator asked "Adam" "I heard they been changing some of the regulation lately". "Adam" responded that "Like, alls they did was. Basically long story short, theres a whole bunch of companies that were trying to sell hemp as cannabis. And they shutdown." The investigator then asked, "So that doesn't

affect you guys at all?" "Adam" responded "No, so everything they were selling was hemp based. We're controlled by the state of Ohio. Everything that (inaudible) is controlled." He further stated that "Everything we have qualifies as medical marijuana". The investigator asked, "and recreational" and "Adam" responded "Absolutely". The investigator then completed the purchase and exited the store. The audio recording was discontinued at 12:06 PM.

The only signage that was observed inside of the building related to regulation were signs that stated, "LICENSED BY DIVISION OF CANNABIS CONTROL".

In-Person Results: Photos of the purchased product and receipt were taken. The product that was purchased was a Shine- Durban Poison vape pen 0.5 grams. The packaging stated that the "Total THC: 440 mg" or "88.00%". The packaging on the product also stated "Mfg Date: 1/21/2026". At approximately 12:10 PM efforts were discontinued and the investigator departed the area.

Notable Observations: Sixty-six (66) vaporizers and thirteen (13) concentrates were listed on the website exceeding 77% THC. These findings are for investigative purposes; verification of exact THC content and product type may be required.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 11:28 AM the investigator arrived at Story Cannabis located at 6400 Brookpark Road, Cleveland, Ohio 44129 to conduct an in-store purchase. An audio recording was taken of the investigator entering the store. Upon entering the store, the investigator first spoke with a female employee at the check-in desk and was then directed to the back room. The investigator was assisted by a cashier who stated her name was "Grace." The investigator requested to purchase a Savvy Juicy Mango 0.3 gram disposable. The employee retrieved the requested item.

The investigator asked "Grace" "What's the, like, stats on that?" "Grace" responded "84% THC". The investigator then asked, "I heard they been changing like, the regulation and stuff recently". "Grace" stated

that "Yes. Um. So, they stopped sale of um, hemp products. Um, that's going to be in like the mom-and-pop shops. Everything like that. So everything that's THC-A. Anything that is not regulated by the state, they cannot sell. Um, which is good." The investigator then asked, "So it doesn't really affect you guys?" "Grace" responded "Right, at all. No, um, the only thing that changed is, um, for medical patients. They can buy more now." The investigator then completed the purchase and exited the store. The audio recording was discontinued at 11:40 AM.

The only signage that was observed inside of the building related to regulation were signs that stated, "LICENSED BY DIVISION OF CANNABIS CONTROL".

In-Person Results: Photos of the purchased product and receipt were taken. The product that was purchased was a Savvy Juicy Mango 0.3 gram disposable. The packaging stated that the "Total THC 252.0mg" or 84% after calculated. The packaging on the product also stated, "Manufactured on 01/07/2026". At approximately 11:42 AM efforts were discontinued and the investigator departed the area.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 3:55 PM the investigator arrived at Sunnyside, 5149 Kennedy Avenue, Cincinnati, Ohio 45213 to conduct an in-store purchase. An audio recording was taken of the investigator entering the store. Upon entering the store, the investigator needed to order the item from a kiosk. Once ordered, the investigator stood in line until their ID was scanned and they were sent into a different line. The investigator was called up, and the employee went to the back to retrieve the Buckeye Banana vape that had been ordered.

The investigator made the purchase and then asked the employee if the new law change was affecting them. The employee stated yes, that starting in September they will no longer be allowed to sell high THC

items over 70%. He also stated they will be allowed to continue to sell their current stock but are not allowed to purchase any new inventory above that threshold.

The only signage that was observed inside of the building related to regulation were signs that stated, "LICENSED BY DIVISION OF CANNABIS CONTROL".

In-Person Results: The product that was purchased was a Buckeye Relief Botanical Disposable – Banana Candy with a THC level of 86%. Manufacturer date: 2/11/2026.

Vaporizers > 77% THC	51
Concentrates > 77% THC	2
Total Products > 77% THC	53

Notable Observations: 51 vaporizers and 2 concentrates exceeding 77% THC threshold documented. Full PDF evidence available in case management system (trulieve.pdf).

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 2:44 PM the investigator arrived at Trulieve, 3528 Columbia Parkway, Cincinnati, Ohio 45226 to conduct an in-store purchase. An audio recording was taken of the investigator entering the store. Upon entering the store, the investigator first spoke with a male employee who took the investigator's ID to scan. The investigator was then sent to the back room where the purchase was made. The investigator requested to purchase a vape and the employee said they could help. The investigator stated they wanted a high THC content due to a high tolerance level. The employee recommended the Buckeye Vape.

The investigator made the purchase and then asked the employee if the new law change was affecting them. The employee stated no that it only affects little convenience stores and places like that, and does not affect the dispensaries.

The only signage that was observed inside of the building related to regulation were signs that stated, "LICENSED BY DIVISION OF CANNABIS CONTROL".

In-Person Results: The product that was purchased was a Buckeye Classic vape with a THC level of 869mg / 86.5%. Manufacturer date: 2/11/2026.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 10:59 AM the investigator arrived at RISE Cleveland located at 1222 Prospect Avenue East, Cleveland, Ohio 44115 to conduct an in store purchase. An audio recording was taken of the investigator entering the store. Upon entering the store, the investigator first spoke with a male employee at the check-in desk and was then directed to the back room. The investigator was assisted by a cashier who stated their name was "Kacey." The investigator requested to purchase a Shine-Fruit Punch 0.85 gram pod-distillate. The employee retrieved the requested item.

The investigator asked "Kacey" "I heard they're changing some of the regulation in Ohio". "Kacey" responded that "Yeah, usually it applies to like medical patients. Some of the percentages have changed, but I'm not really sure if that's went into effect yet." The investigator then asked, "It doesn't really affect

you guys that much". "Kacey" responded "Nah, not that much." The investigator then completed the purchase and exited the store. The audio recording was discontinued at 11:05 AM.

The only signage that was observed inside of the building related to regulation were signs that stated, "LICENSED BY DIVISION OF CANNABIS CONTROL".

In-Person Results: Photos of the purchased product and receipt were taken. The product that was purchased was a Shine- Fruit Punch 0.85 gram pod-distillate. The packaging stated that the "Total THC: 776.05 mg" or "91.30%". The packaging on the product also stated "Mfg Date: 12/19/2025". At approximately 11:07 AM efforts were discontinued and the investigator departed the area.

Vaporizers > 77% THC	21
Concentrates > 77% THC	0
Total Products > 77% THC	21

Notable Observations: Twenty-one (21) vaporizers and zero (0) concentrates were listed on the website exceeding 77% THC. All products observed were listed at 30% off. Brands included Common Citizen, Select, Savvy, Dampen, HillFire, Firelands Scientific, Lighthouse Sciences, Ancient Roots, and RedBud. These findings are for investigative purposes; verification of exact THC content and product type may be required.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 10:20 AM the investigator arrived at Therapy Cannabis - Cleveland Dispensary located at 13429 Lakewood Heights Boulevard, Cleveland, Ohio 44107 to conduct an in-store purchase. An audio recording was taken of the investigator entering the store. Upon entering the store, the investigator first spoke with a male employee at the check-in desk and was then directed to the back room. The investigator was assisted by a cashier whose name was believed to be spelled "Laquita." The investigator requested to purchase a Dampen Pineapple OG 1 gram vape. The employee retrieved the requested item.

The investigator asked "Laquita" "I heard they're starting to change some of the regulation in Ohio". "Laquita" responded that "Yeah they are so. (Inaudible) cuz they changed them last week and they changed them back again. It's literally like in between. One thing is for sure that a lot of the dispensaries that are not medical are closed. That's the one thing for sure." The investigator then asked, "Is it like edibles?" "Laquita" responded "Everything. Like most of the dispensaries that are not medical are now closed." The investigator then completed the purchase and exited the store. The audio recording was discontinued at 10:40 AM.

The only signage that was observed inside of the building related to regulation were signs that stated, "LICENSED BY DIVISION OF CANNABIS CONTROL". Due to loud background noise, including music within the facility, portions of the audio recording were difficult to clearly discern.

In-Person Results: Photos of the purchased product and receipt were taken. The product that was purchased was a Dampen Pineapple OG 1 gram vape. The packaging stated that the "Total THC: 847 mg"

or 84.7% after calculated. The packaging on the product also stated, "Manufactured on: 02/16/26". At approximately 10:42 AM efforts were discontinued and the investigator departed the area.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 9:48 AM the investigator arrived at The Landing Dispensary located at 1085 West Bagley Road, Berea, Ohio 44017 to conduct an in-store purchase. An audio recording was taken of the investigator entering the store. Upon entering the store, the investigator first spoke with a female employee at the check-in desk and was then directed to the back room. The investigator was assisted by a cashier who stated his name was "Ian." The investigator requested to purchase an Heir-Tropic Talisman 1 gram disposable. The employee retrieved the requested item.

The investigator asked "Ian" "My buddy was saying they're changing some of the regulation with this stuff?" "Ian" responded that "It doesn't really affect us cuz we, everything we (inaudible) is medicine (inaudible), sort of like the hemp stuff and kinda other things like that. Mostly small changes but not until

September at the earliest." The investigator then completed the purchase and exited the store. The audio recording was discontinued at 9:54 AM.

The only signage that was observed inside of the building related to regulation were signs that stated, "LICENSED BY DIVISION OF CANNABIS CONTROL".

In-Person Results: Photos of the purchased product and receipt were taken. The product that was purchased was a Heir- Tropic Talisman 1 gram disposable. The packaging stated that the "Total THC: 866.60 mg" or 86.66% after calculated. The packaging on the product also stated, "Manufacture Date: 3/5/2026". At approximately 9:58 AM efforts were discontinued and the investigator departed the area.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 9:13 AM the investigator arrived at FRX Elyria Craft Cannabis Dispensary located at 709 Sugar Lane, Elyria, Ohio 44035 to conduct an in-store purchase. An audio recording was taken of the investigator entering the store. Upon entering the store, the investigator observed a male security guard and was assisted by a female employee at a kiosk. The investigator was subsequently assisted by an employee who stated her name was "Erin," while a second female employee of unknown name was observed standing nearby. The investigator requested to purchase a Seed & Strain-White Widow 1 gram cartridge. The employee retrieved the requested item.

The investigator asked "Erin" "They've been changing like some of stuff with like edibles and...". "Erin" responded "That's more so for medical from what I'm understanding anyways.". The investigator then asked a second employee "They're changing a lot of the, like the regulation in Ohio". The second

employee responded "Yeah. It's a lot of hemp derived products. So not stuff that we sell. Um, but they're... They also changed for medical patients." The investigator then completed the purchase and exited the store. The audio recording was discontinued at 9:21 AM.

The only signage that was observed inside of the building related to regulation were signs that stated, "LICENSED BY DIVISION OF CANNABIS CONTROL".

In-Person Results: Photos of the purchased product and receipt were taken. The product that was purchased was a Seed & Strain- White Widow 1 gram cartridge. The packaging stated that the "Total THC: 835.00 mg" or 83.5% after calculated. The packaging on the product also stated, "Manufacture Date: 01/09/26". At approximately 9:25 AM efforts were discontinued and the investigator departed the area.

Vaporizers > 77% THC	128
Concentrates > 77% THC	1
Total Products > 77% THC	129

Notable Observations: 128 vaporizers and 1 concentrate exceeding 77% THC threshold documented. 28 screenshots captured during search conducted 5:04–5:13 PM.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 3:11 PM the investigator arrived at Zen Leaf located at 3224 Cleveland Avenue Northwest, Canton, Ohio 44709 to conduct an in-store purchase. An audio recording was taken of the investigator entering the store. Upon entering the store, the investigator first spoke with a female employee at the check-in desk and was then directed to the back room. The investigator was assisted by an employee whose name was believed to be spelled "Renae." The investigator requested to purchase The Lab- King Louis XIII. The employee retrieved the requested item.

The investigator asked "Renae" "I heard the regulation has been changing lately. Do you know anything about that?" and "I thought it was with like vapes and THC or something." Due to background noise within the facility, the exact phrasing of the response was unable to be clearly determined from the recording; however, "Renae" indicated that it is mostly affecting the smoke shops and not really the dispensaries. The

investigator then completed the purchase and exited the store. The audio recording was discontinued at approximately 3:19 PM.

The only signage that was observed inside of the building related to regulation were signs that stated, "LICENSED BY DIVISION OF CANNABIS CONTROL".

In-Person Results: Photos of the purchased product and receipt were taken. The product that was purchased was The Lab- King Louis XIII 0.5g all-in-one. The packaging stated that the "Total THC" was "405.87" mg or 81.174% after calculated. The packaging on the product also stated, "Manufactured Date: 12/5/2025". At approximately 3:22 PM efforts were discontinued and the investigator departed the area.

Vaporizers > 77% THC	160
Concentrates > 77% THC	10
Total Products > 77% THC	170

Notable Observations: 160 vaporizers and 10 concentrates exceeding 77% THC threshold documented — highest combined total of all locations searched. 43 screenshots captured during search conducted 4:47–5:02 PM.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 3:54 PM the investigator arrived at The Botanist located at 3840 Greentree Avenue Southwest, Canton, Ohio 44706 to conduct an in store purchase. An audio recording was taken of the investigator entering the store. Upon entering the store, the investigator first spoke with a male employee at the check-in desk and was then directed to the back room. The investigator was assisted by an employee who stated his name was "Kyle." The investigator requested to purchase a Shine- Blue Burst 0.85 gram Luster Pod. The employee retrieved the requested item.

The investigator asked "Kyle" "What's the THC on that?" "Kyle" responded "91.2". The investigator then asked, "I heard they're, like, doing some regulation stuff lately". "Kyle" stated that "Yeah. And honestly it affects all of the like smokeshops and non-regulated dispensaries more than us and it does affect how you carry like you're not allowed to have open products in your car anymore. You're supposed to have them in

your trunk in theory. Um, but especially no open products stuff like that. But, as far as what we're able to sell there's not a lot of radical changes like that. Cuz, um, and always (inaudible) on the level of regulation of potency in Ohio but there is also a variance allowance too so." He further stated that "But yeah, like I said, you know like, even like whole-foods stores, that sold CBD, they mostly had to pull all of their products too." The investigator then completed the purchase and exited the store. The audio recording was discontinued at approximately 4:01 PM, and additional audio was recorded at 4:02 PM.

The only signage that was observed inside of the building related to regulation were signs that stated, "LICENSED BY DIVISION OF CANNABIS CONTROL".

In-Person Results: Photos of the purchased product and receipt were taken. The product that was purchased was a Shine- Blue Burst 0.85 gram Luster Pod. The packaging stated that the "Total THC: 775.2 mg" or "91.2%". The packaging on the product also stated "Mfg Date: 12/19/2025". At approximately 4:06 PM efforts were discontinued and the investigator departed the area.

Notable Observations: 68 vaporizers and 6 concentrates exceeding 77% THC threshold documented. 20 screenshots captured during search conducted 4:34–4:48 PM.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 4:07 PM the investigator arrived at Ohio Cannabis Company located at 4016 Greentree Southwest, Canton, Ohio 44706 to conduct an in-store purchase. An audio recording was taken of the investigator entering the store. Upon entering the store, the investigator first spoke with a male employee at check-in and was then directed to the back room. The investigator was assisted by an employee identified as "Christina," while a second employee was observed nearby the check-out counter during the transaction. The investigator requested to purchase a Shine- Green Crackle Disposable 0.5 gram. The employee retrieved the requested item.

The investigator asked "Christina" if their company has been affected by any of the regulation going on. "Christina" stated that "That's all for the synthetic" and "Not really with the dispensaries" and "More or less like your smoke shops". A nearby employee of unknown name also stated that "If anything it helped

us because it's cutting out (inaudible) the drinks they can't get anywhere else". The audio recording was discontinued at 4:13 PM.

The only signage that was observed inside of the building related to regulation were signs that stated, "LICENSED BY DIVISION OF CANNABIS CONTROL".

In-Person Results: Photos of the purchased product and receipt were taken. The product that was purchased was a Shine- Green Crackle Disposable 0.5 gram. The packaging stated that the "Total THC: 438mg" or "87.60%". The packaging on the product also stated "Mfg Date: 1/21/2026". At approximately 4:16 PM efforts were discontinued and the investigator departed the area.

Vaporizers > 77% THC	6
Concentrates > 77% THC	1
Total Products > 77% THC	7

Notable Observations: This is noted to be more items than observed meeting this threshold compared to what was observed during the previous internet search on Thursday, April 2, 2026.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 3:32 PM the investigator arrived at Klutch Cannabis located at 401 Cherry Avenue Northeast, Canton, Ohio 44702 to conduct an in-store purchase. An audio recording was taken of the investigator entering the store. Upon entering the store, the investigator first spoke with a female employee at the front desk and was then directed to the back room. The investigator ordered the selected item from a kiosk, Seed & Strain- Grape one-gram all-in-one cannabis vape and was subsequently assisted by an employee who stated his name was "Jake". The employee retrieved the requested item.

The investigator asked "Jake" if "they" as in their company was affected by the new laws related to cannabis. "Jake" stated that "No, it doesn't affect us. If anything, it just brings new people in here that have been going to like gas stations and stuff like that." He further stated that "I'm a big fan of it though because it gets unregulated shit out of the market because someone that's just eaten a thousand milligrams of like gas station gummies will come here and eat a fifty and just...". The investigator then

completed the purchase and exited the store. The audio recording was discontinued at approximately 3:39 PM and a final audio recording discontinue time was 3:40 PM.

The only signage that was observed inside of the building related to regulation were signs that stated, "LICENSED BY DIVISION OF CANNABIS CONTROL".

In-Person Results: Photos of the purchased product and receipt were taken. The product that was purchased was a Seed & Strain- Grape one-gram all-in-one cannabis vape. The packaging stated that the "Total THC: 856.00 mg" or 85.6% after calculated. The packaging on the product also stated, "Manufacture Date: 11/05/25". At approximately 3:45 PM efforts were discontinued and the investigator departed the area.

Vaporizers > 77% THC	87
Concentrates > 77% THC	2
Total Products > 77% THC	89

Notable Observations: Second-highest total product count of all locations searched — 87 vaporizers and 2 concentrates exceeding 77% THC threshold. 87 screenshots captured across a search spanning 5:51 PM to 6:34 PM documenting the full range of products. Full screenshot documentation available in case management system.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 7:39 PM the investigator arrived at Columbia Care Dispensary located at 300 North Street, Monroe, Ohio 45050 to conduct an in-store purchase. An audio recording was taken of the investigator entering the store. Upon entering the store, the investigator first spoke with a security guard and was seated in the lobby. The investigator was then called back to a second room where purchases of product were conducted. The investigator spoke with an employee who stated her name was "Nicky" or "Nichole Barnes" as found on the receipt provided after purchase. The investigator requested to buy a one gram cartridge of Old Granger Extracts- Blue Dream. The employee retrieved the requested item.

The investigator asked "Nicky" about the laws changing in Ohio regarding cannabis. "Nicky" stated that "as far as recreational goes, just put it in your trunk", "if you get caught with it...". A second question was asked regarding purchasing items. "Nicky" stated that "that hasn't changed, the only thing that has changed with that is the amount". She also stated that "the medical side we are equal to rec now". The investigator then completed the purchase and exited the store. The audio recording was discontinued at 7:48 PM.

The only signage that was observed inside of the building related to regulation were signs that stated, "LICENSED BY DIVISION OF CANNABIS CONTROL".

In-Person Results: Photos of the purchased product and receipt were taken. The product that was purchased was Old Granger- Blue Dream 1g cartridge. The packaging stated that the "Total THC: 905.8" mg or 90.5% after calculated. The packaging on the product also stated, "Manufactured Date: 2/10/2026". At approximately 7:50 PM efforts were discontinued and the investigator departed the area.

Vaporizers > 77% THC	40
Concentrates > 77% THC	8
Total Products > 77% THC	48

Notable Observations: 40 vaporizer products and 8 concentrate products exceeding 77% THC threshold documented. All products over 77% THC were on sale at 30-40% off. Full PDF evidence available (NectarMedicalCannabisDispensaryScreenshots.pdf).

Online Advertising Note: During the online investigation of this dispensary, the investigator observed that all products over 77% THC were on sale at 30-40% off. The Eden's Trees Mango Cart 1G Dist Indica was advertised online at THC: 900mg for \$26.60 (30% off \$38.00). These same sale prices were available in-store.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 4:22 PM the investigator arrived at Nectar Medical Cannabis Dispensary located at 3405 Werk Road, Cincinnati, Ohio 45211 to conduct an in-store purchase. An audio recording started shortly before walking into the store; the recording stopped shortly after entering so another recording started discreetly while inside the store at 4:24 PM. The second audio recording ended shortly after exiting the store at approximately 4:40 PM.

Upon entering the store, the investigator first spoke with a female employee at the check-in desk and was then directed to get cash from the ATM if necessary and then speak to an associate behind the counter. The investigator was assisted by an employee identified as "Alex" who checked the investigator's ID and helped find the product available matching what the investigator found online. He was not able to confirm the percentage of THC prior to obtaining the product from the stock information in the system; once the product was identified and obtained, it was determined to be 873mg for a 1g disposable.

After the sale was completed, the investigator asked about the recent law change and how that affected them. The associate "Alex" explained it was the "purchasing limits for recreational/medical side". He started to explain it changed things for them for the checking out process and another associate (unknown name) interrupted and began explaining it made the sales easier for them because they no longer have to track the medical sales as extensively. The unknown associate stated, "instead of medical getting 4.5oz every 45 days [...] Medical is now 10oz every day". He then advised nothing changed on the recreational side and stated "the unspoken rules of cannabis are now law" referring to the consumer such as keeping it in your trunk and not smoking it in public.

The only signage that was observed inside of the building related to regulation was posted licensing such as Cannabis licensing, State of Ohio licensing as well as the City of Cincinnati licensing; this signage was in a far off corner slightly difficult to notice from the general shopping portion of the room. This location had some product signage and a lot of 'sale' signage including a TV display that changed every 30-45 seconds to another sale, cycling through approximately four different advertised sales. During the online investigation of this dispensary, it was noted by the investigator that all the products over 77% THC were on sale at 30-40% off. These same sale prices were available in-store.

In-Person Results: Photos of the purchased product and receipt were taken. The product that was purchased was an Eden's Trees Mango Cart Disposable 1g. The packaging stated that the "Total THC" was "873mg" or "87.3%" with a manufacture date of 11/25/2025. The investigator noted that the receipt shows (.90g) and the online product was advertised as 900mg, but the product received was 873mg. At approximately 4:40 PM efforts were discontinued and the investigator departed the area.

Vaporizers > 77% THC	135
Concentrates > 77% THC	9
Total Products > 77% THC	144

Notable Observations: 135 vaporizer products and 9 concentrate products exceeding 77% THC threshold documented. All products over 77% THC were on sale at 20-30% off. Full PDF evidence available (TheGardenbyKCGScreenshots.pdf).

Online Advertising Note: During the online investigation of this dispensary, the investigator observed that all products over 77% THC were on sale at 20-30% off. The Old Pal: Animal Mintz Disposable 1g was advertised online at THC: 87.81% for \$26.60 (30% off \$38.00). These same sale prices were available on the in-store kiosks.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 3:51 PM the investigator arrived at The Garden by KCG located at 2927 Colerain Avenue, Cincinnati, Ohio 45225 to conduct an in-store purchase. An audio recording started shortly before walking into the store; the recording stopped shortly after entering so another recording started discreetly while inside the store at 3:53 PM. The second audio recording ended shortly after exiting the store at approximately 4:01 PM.

Upon entering the store, the investigator first spoke with a female employee at the check-in desk and was then directed to the kiosks to submit an order and to then head to the register for check-out. The investigator stood in line for several minutes for an open kiosk; there were no staff walking around offering assistance on what to order. The investigator then placed the order on the kiosk, then approached the check-out desk and was assisted by an employee identified as "Scott" who checked the investigator's ID and obtained the ordered item. He verbally verified the product was "88%" once he obtained the product prior to the sale.

After the sale was completed, the investigator asked about the recent law change and how that affected them. The associate "Scott" explained that it "does not affect us yet" and went on to explain that it only affects smoke shops. He then explained that it's only illegal in Ohio and that you could go to Indiana to get it where marijuana is not illegal. He also stated, "we're the only state out of 50 that you can't buy hemp products that are..."

The only signage that was observed inside of the building related to regulation was posted licensing such as Cannabis licensing, State of Ohio licensing as well as the City of Cincinnati licensing. This location had some product advertisement signage and some 'sale' signage. During the online investigation of this dispensary, it was noted by the investigator that all of the products over 77% THC were on sale at 20-30% off. These same sale prices were available on the kiosks in the store.

In-Person Results: Photos of the purchased product and receipt were taken. The product that was purchased was an Old Pal: Animal Mintz Disposable 1g. The packaging stated that the "Total THC" was "878.17mg" or "87.81%" (labeled as 87.8% on Product Facts) with a manufacture date of 03/04/2026. The investigator noted that the receipt shows (.85g). At approximately 4:01 PM efforts were discontinued and the investigator departed the area.

Vaporizers > 77% THC	89
Concentrates > 77% THC	2
Total Products > 77% THC	91

Notable Observations: 89 vaporizer products and 2 concentrate products exceeding 77% THC threshold documented. All products over 77% THC were on sale at 30% off. Full PDF evidence available (ZipsDispensaryScreenshots.pdf).

Online Advertising Note: During the online investigation of this dispensary, the investigator observed that all products over 77% THC were on sale at 30% off. The Eden's Trees BD Disposable 1g was advertised online at THC: 87.7% for \$28.00 (30% off \$40.00). These same sale prices were available on the in-store kiosks. Employee 'Andrew' verbally described the product as '87% THC, which is pretty hard to find in Ohio.'

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 3:24 PM the investigator arrived at Zips Dispensary located at 1801 Central Parkway, Cincinnati, Ohio 45214 to conduct an in-store purchase. An audio recording started shortly before walking into the store; the recording stopped shortly after entering so another recording started discreetly while inside the store at 3:26 PM. The second audio recording ended shortly after exiting the store at approximately 3:32 PM.

Upon entering the store, the investigator first spoke with a male employee at the check-in desk and was then directed to the kiosks to submit an order and to then head to the register for check-out. The investigator placed the order on the kiosk then approached the check-out desk and was assisted by an employee identified as "Andrew" who checked the investigator's ID and obtained the ordered item. He verbally verified the product was "87% THC, which is pretty hard to find in Ohio" once he obtained the product prior to the sale. The investigator did not ask about the recent law change and exited the store shortly after the purchase was complete.

The only signage that was observed inside of the building related to regulation was posted licensing such as Cannabis licensing, State of Ohio licensing as well as the City of Cincinnati licensing. This location had several product advertisement signage. During the online investigation of this dispensary, it was noted by the investigator that all of the products over 77% THC were on sale at 30% off. These same sale prices were available on the kiosks in the store.

In-Person Results: Photos of the purchased product and receipt were taken. The product that was purchased was an Eden's Trees BD Disposable 1g. The packaging stated that the "Total THC" was "877mg" or "87%" with a manufacture date of 01/23/2026. The investigator noted that the receipt shows (.88g). At approximately 3:32 PM efforts were discontinued and the investigator departed the area.

Vaporizers > 77% THC	73
Concentrates > 77% THC	3
Total Products > 77% THC	76

Notable Observations: 73 vaporizer products and 3 concentrate products exceeding 77% THC threshold documented. Many products over 77% THC were on sale at 25-30% off. Full PDF evidence available (AscendCannabisScreenshots.pdf).

Online Advertising Note: During the online investigation of this dispensary, the investigator observed that a lot of the products over 77% THC were on sale at 25-30% off. The Ozone Rainbow Kush PIXI Disposable 1g was advertised online at THC: 83.55% for \$30.00 (25% off \$40.00). These same sale prices were available on the in-store kiosks. Employee 'Marcus' verbally confirmed the product was '83.55%' and stated 'if you are looking for the strongest this is right.'

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 3:00 PM the investigator arrived at Ascend Dispensary located at 830 Reedy Street, Cincinnati, Ohio 45202 to conduct an in store purchase. An audio recording started shortly before walking into the store; the recording unknowingly stopped shortly after

entering so another recording started discreetly while inside the store at 3:03 PM. The second audio recording ended shortly after exiting the store at approximately 3:06 PM.

Upon entering the store, the investigator first spoke with a female employee at the check-in desk and was then directed to the second room with a kiosk to submit the order and to then head to the register for check-out. The investigator was assisted by an unknown employee at the kiosk who verbally confirmed the item selected was of high THC content of 83.55% (not on recording). The investigator then approached the check-out desk and was assisted by an employee identified as "Marcus" who checked the investigator's ID and obtained the ordered item. He verbally confirmed that "if you are looking for the strongest this is right" prior to collecting the product, then verbally verified it was "83.55%" once he obtained the product prior to the sale.

After the sale was completed, the investigator asked about the recent law change and how that affected them. The associate "Marcus" went on to explain that the changes did not really affect the dispensary, it would only affect the consumer and the hole in the wall smoke shops that are not regulated. He went on to describe the types of shops that "have a jar of weed on the counter". He also stated, "most of the things that changed were already illegal they just had to come out and say it".

The only signage that was observed inside of the building related to regulation was posted licensing such as Cannabis licensing, State of Ohio licensing as well as the City of Cincinnati licensing. This location had a lot of product signage and some 'sale' signage. During the online investigation of this dispensary, it was noted by the investigator that a lot of the products over 77% THC were on sale at 25-30% off. These same sale prices were available on the kiosks in the store.

In-Person Results: Photos of the purchased product and receipt were taken. The product that was purchased was an Ozone Rainbow Kush PIXI Disposable 1g. The packaging stated that the "Total THC" was "835.58mg" or "83.55%" with a manufacture date of 03/04/2026. The investigator noted that the receipt shows (.70g). At approximately 3:06 PM efforts were discontinued and the investigator departed the area.

--------------------------	---

Notable Observations: SS Diesel Vape Cartridge 1g (Sativa) advertised at THC: 85.2% for \$24.85 (30% off \$35.50). Product specifications confirmed: Phenotype: Sativa, Cartridge Size: 1g, THC: 85.2%, CBD: 0.35%, CBN: 0.65%, Brand: Bloom Cannabis, Cartridge Type: Cart, Oil Type: Distillate. Screenshot captured at 8:33 AM on day of in-person visit.

Online Advertising Note: During pre-investigation online review of bloommarijuana.com, the SS Diesel Vape Cartridge 1g was advertised at THC: 85.2% for \$24.85 (30% off \$35.50). The product was on sale at 30% off at time of online search and the same discount was applied at time of in-store purchase.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 8:41 AM the investigator arrived at Bloom Medicinals (storefront presented as Bloom Cannabis) located at 1361 Georgesville Road, Columbus, Ohio 43228 to conduct an in-store purchase. Upon entering the store, the investigator spoke with an associate named "Kori" and stated they were looking for the highest potency THC vape or cartridge available, specifically a sativa, for pain management. Kori understood the request and began showing options on her kiosk screen. The investigator had previously identified a specific item (SS Diesel) during online preinvestigation that met the parameters of this investigation. Upon seeing the item on the kiosk screen, the investigator expressed interest in the product and asked if it would help with pain. Kori enthusiastically agreed that it would help and stated that it would only take a couple of "hits" to achieve the desired effect. Kori then retrieved the item and completed the sale. The investigator was unable to ask questions about the new law and compliance, as the customer line was long and employees were rushing customers through.

In-Person Results: Photos of the purchased product and receipt were taken. The product purchased was a Bloom Cannabis SS Diesel Vape Cartridge 1g (Sativa). The Product Facts label stated Total THC: 852.00mg (85.2%) with a manufacture date of 01/29/2026. The receipt shows the product was sold as (.81g), SKU M00001273615, at a unit price of \$35.50 with a 30% discount applied (\$10.65 off), for a total of \$29.32.

In-Person Investigation Narrative

On Saturday, April 4, 2026, at approximately 9:23 AM the investigator arrived at Theory Wellness located at 3905 Sullivant Avenue, Columbus, Ohio 43228 to conduct an in-store purchase. Upon entering the store, the investigator spoke with an associate named "Shane" and stated they were looking for the strongest/most potent sativa available for pain treatment in vape or cartridge form. After answering a series of questions from Shane, he suggested "Eden's Trees", a disposable vape with a total THC of 895.00 mg. Shane concluded the sale and the investigator then asked how the new law had affected them, if at all. Shane stated that it had not affected them at all because of their "license", that they are a medical dispensary as well, that the company is based in Boston and operates throughout the country. Shane agreed with the investigator when the investigator stated, "so you guys kind of have a workaround and the new law doesn't apply to you."

In-Person Results: Photos of the purchased product and receipt were taken. The product purchased was an Eden's Trees SD (Super Diesel) Disposable Vape 1g. The Product Facts label stated Total THC: 895.00 mg, Delta-9 THC: 895.00 mg (89.5%), THCV: 5.38 mg, Total CBD: 0.00 mg, with a manufacture date of 12/23/2025, packaged 1/14/2026, tested 1/12/2026. The receipt shows the product was sold as (.90g),

Order #238104150, at a unit price of \$38.00, with total tax of \$6.84, for a total of \$44.84. Payment was made by debit.

Compliance Response

Shane stated the new law had not affected them at all due to their 'license.' He noted they are also a medical dispensary, that the company is based in Boston and operates throughout the country. Shane agreed when the investigator characterized this as a 'workaround' where the new law does not apply to them.

Audio File(s): TheoryWellness.m4a

Audio Transcription Summary

Recording begins with investigator Tim B. identifying the location: 'This is Tim B. It's April 4th, 2026. It is 9:15 AM. I am entering Theory Wellness on 3905 Sullivan Avenue, Columbus, Ohio, 43228.' The substantive interaction begins at approximately 7:11 into the recording. Associate Shane recommends 'ECF 895' and asks if the investigator is looking for relaxation. The investigator's date of birth (August 2, 1983) is captured during ID verification. Shane states: 'My name is Shane. Appreciate it, bro. Your total capacity is going to be 4,484.' Shane adds: 'If you think it will go backwards, you're going to have to lay on your back. It's going to feel good.' The recording ends with the investigator stating: 'End recording at 9:25 AM.' Note: The compliance response regarding the 'license' and 'workaround' characterization was captured in field notes; portions of the audio were not clearly transcribed due to ambient noise.

Vaporizers > 77% THC	95
Concentrates > 77% THC	1
Total Products > 77% THC	96

Notable Observations: Screenshot captured at 9:59 AM on April 4, 2026, showing Firebrand Cart BL DM (H) 1g at 83.1% THC (\$20.00, \$9.00 off \$29.00), Vapen Cart MW (S) 1g at 82.9% THC (\$21.00, \$14.00 off \$35.00), and Vapen Cart PCH RNGS (S) 1g at 85.4% THC — all exceeding 77% THC threshold.

In-Person Investigation Narrative

At this location, the investigator pre-picked an item from the online store called Firebrand, which is a cartridge containing 83.1% THC. The investigator told the associate they were looking for this specific item. The associate retrieved the item and completed the sale. When asked if the new law had affected them in any way, the associate stated it had not affected them because they are a licensed dispensary and pointed to an ID card hanging around his neck saying, 'and we have these.' The investigator could not read the ID card but noted it contained the associate's picture and name.

Compliance Response

Associate stated the new law has not affected them because they are a licensed dispensary; pointed to employee ID badge as justification.

Vaporizers > 77% THC	106
Concentrates > 77% THC	1
Total Products > 77% THC	107

Notable Observations: Screenshot captured at 10:24 AM on April 4, 2026, showing Vaporizers section filtered to Columbus location. UB Good Blue Rush Cart (1g) Sativa at 86.5% THC for \$36.00; Supply Durban Poison Cart (1g) Sativa at 81.52% THC — both exceeding 77% THC threshold.

In-Person Investigation Narrative

Before entering Greenlight Dispensary, the investigator selected an item from their website called UB Good Blue Rush Cart with 86.5% THC (Sativa). The investigator entered the location and spoke to an associate about the product. The associate brought the item up on the kiosk screen and confirmed it was what the investigator was looking for. As the associate completed the sale, the investigator asked how the new law was impacting them. The associate helping the investigator and an additional associate behind the counter both stated they are unaffected by the law, explaining that Ohio measures the weight of the plant when it is wet and that is the only measurement taken, so when it is dry the THC level is compliant because it is not weighed when dry. The investigator then stated, 'so ignorance is bliss?' and both associates agreed.

Compliance Response

Two associates stated the new law does not affect them because Ohio measures plant weight when wet, not dry — claiming THC is compliant at dry weight. Both associates agreed with the investigator's characterization of 'ignorance is bliss.'

Vaporizers > 77% THC	148
Concentrates > 77% THC	2
Total Products > 77% THC	150

Notable Observations: Screenshot captured at 10:54 AM on April 4, 2026 showing: item at top (partially visible) at \$42.00 (30% off \$60.00); Firelands Scientific Salty Watermelon 1g High-Potency Full Spectrum Cart Sativa at 79.3% THC (\$24.50, 30% off \$35.00); Rove Fruit Punch 1g High-Potency Live Resin Diamond Starter Kit Sativa at 92.41% THC (\$49.00, 30% off \$70.00); Blue Range Potency Savvy Sativa (partially visible). Multiple products exceeding 77% THC threshold. Additionally, on 4/9/26, the investigator pre-ordered two vape items that met the parameters of this investigation and later picked up the items using the drive-through.

In-Person Investigation Narrative

On Saturday, April 4, 2026, the investigator entered Certified Dispensary and spoke with an associate about finding the strongest THC sativa vape or cartridge available for pain management, noting a very high tolerance and a dislike of edibles. The associate indicated she needed to consult with her supervisor regarding a recommendation and returned suggesting the IKRUSHER, which carried a total THC of 743 mg (74.3%). The investigator completed the purchase. Following the transaction, the investigator asked how the recent law change was affecting the dispensary. The associate stated that they are licensed by the

state and are therefore unaffected and did not provide any additional detail beyond repeating that they are licensed by the state.

On Thursday, April 9, 2026, the investigator conducted a secondary visit by pre-ordering two vaporizer products online that met the parameters (82% and 92.60% respectively) of this investigation. After placing the order, the investigator received an email notification confirming the order was ready. The investigator drove to the dispensary and entered the drive-through lane. The drive-through associate requested the investigator's identification, concluded the transaction, and provided the order. The investigator did not ask any questions regarding the new law during this visit.

Compliance Response

Associate stated they are licensed by the state, so they are unaffected by the new law. No further detail provided.

Threshold Analysis Note

The product purchased at this location (FL Sunrise LLD iKrusher 1g) showed a Total THC of 743 mg (74.3%) on the Product Facts label, which is below the 77% THC threshold on a straight percentage basis. However, the label also shows Delta-9 THC: 674 mg and THCa: 75.7 mg. On a net cannabinoid basis (Delta-9 + THCa = 749.7 mg), the product approaches but does not clearly exceed the 77% THC threshold (770 mg for a 1g product). Upon further review, this location is reclassified as VIOLATION. While the Total THC figure as labeled (74.3%) falls below the 77% threshold, the website menu actively advertised products exceeding 77% THC, including Rove Fruit Punch 1g at 92.41% THC. This location is therefore classified as VIOLATION.

Notable Observations: Website screenshots captured at 11:43–11:44 AM on April 4, 2026 showing: (1) Black Mamba (Sativa) Airo Cart 1g — THC: 836 mg (83.6%) — \$50.00; (2) Blue Dream (Sativa) Distillate Cart 1g — 2day — POW — THC: 799 mg (79.9%), CBD: 3.06 mg — \$35.00; (3) Blue Dream (Sativa) Distillate DVP 0.5g — POW — THC: 399.5 mg (79.9%), CBD: 1.53 mg — \$20.00; (4) Blue Dream (Sativa) Distillate iKrusher DVP 1g — 2day — POW — THC partially obscured, CBD: 3.06 mg — \$34.00. At least 70 vaporizer products confirmed exceeding 77% THC threshold.

In-Person Investigation Narrative

Before entering this location, investigator searched the location's website and found an item meeting the investigation's requirements: Blue Dream Sativa Cartridge 0.50g with 399.50 mg total THC (79.9% THC). After entering the location, investigator approached the associate and stated they were looking for substantial pain relief and pointed out the above-stated item when found on the kiosk. The associate confirmed the product would work for that purpose and concluded the transaction. Investigator then asked the associate how the new law has affected them. The associate stated the law did not apply to them as they are licensed by the state. This was all the information the associate would divulge.

Compliance Response

Associate stated the law did not apply to them as they are licensed by the state.

APPENDIX A

Online Menu Review — Products Advertised Above 77% D9-THC Threshold

All 30 Investigated Locations | Review Date: April 9, 2026

100% Violation Rate	30 / 30 Locations in Violation	1,670 Total Products >77%	1,585 Vaporizer Violations	85 Concentrate Violations
-------------------------------	--	-------------------------------------	--------------------------------------	-------------------------------------

All 30 dispensaries investigated were reviewed for online menu compliance with Ohio's 70% THC limit for extracts, with the threshold of the investigation set at a minimum of 77% THC to allow for any variance that can occur in testing. This was prior to discussion with counsel who later advised that regardless of any allowed variance, advertising products over the 70% potency limit set by the state in SB 56 is a violation due to the statement of the law in section 3796.06 Section E of the Ohio Revised Code (<https://codes.ohio.gov/ohio-revised-code/section3796.06>) that caps the potency of any product for sale to no more than 70% for extracts. Appendix C tracks additional violations. The table below documents the number of vaporizer and concentrate products found advertised above the threshold on each location's publicly accessible online menu as of April 9, 2026. A combined total of **1,670 non-compliant product listings** were identified across all 30 locations (1,585 vaporizers and 85 concentrates). Locations marked with an asterisk (*) reflect minimum confirmed counts based on a single screenshot; actual totals at those locations may be higher.

APPENDIX B

Market Representation — Ownership Context

Active Ohio Licensed Dispensaries at Time of Investigation | April 9, 2026

30 Locations Investigated	149 Total Locations Controlled by Investigated Owners	71.9% of All Active Ohio Dispensaries Represented
-------------------------------------	--	--

The 30 dispensary locations investigated in this matter are not isolated, independent operators. The corporate ownership groups behind these 30 locations collectively control **149 of the 207 active licensed dispensary locations in Ohio** as of the date of investigation — representing **71.9% of all active Ohio dispensaries**. This means that the non-compliant online advertising practices documented in this investigation are not limited to the 30 locations visited; they are systemic across the majority of the Ohio licensed dispensary market.

Ohio Active Licensed Dispensaries — Market Representation

Owners of Investigated Locations — 149 locations (71.9%)	Other Owners — 58 locations (28.1%)
149 of 207 active Ohio dispensaries	58 dispensaries

Key Finding:

The non-compliant online advertising practices documented in this investigation — products with THC concentrations exceeding Ohio's 70% THC limit for extracts actively advertised on publicly accessible dispensary menus — are not isolated to the 30 locations visited. The corporate owners of these 30 locations control 71.9% of all active licensed dispensaries in Ohio as of April 9, 2026. This investigation therefore provides a representative cross-section of the Ohio licensed cannabis market and supports the conclusion that the pattern of non-compliance is industry-wide rather than location-specific.

APPENDIX C

Online Menu Review — Products in the 70.1%–77% THC Range

All 30 Investigated Dispensary Locations

As a supplement to the primary investigation documenting products exceeding 77% Total THC, a secondary online menu review was conducted across all 30 investigated dispensary locations to identify vaporizer and concentrate products advertised within the 70.1%–77% THC range. This review was conducted between April 16–20, 2026, by members of the investigative team. The table below summarizes the number of products in this secondary threshold range identified on each dispensary's publicly accessible online menu at the time of the search. These findings are for investigative purposes; the reported THC content was determined through basic internet search, and verification may be required to confirm exact THC content and product classification.

Note: Entries marked with (‡) reflect combined vaporizer and concentrate totals where a product-type breakdown was not separately documented by the investigator. Entries marked with an asterisk () reflect minimum confirmed product counts based on screenshot documentation; actual totals at those locations may be higher.*

#	Dispensary	Address	Zone	Vapes 70– 77%	Conc. 70– 77%	Total 70– 77%	Search Date	Notes

30	Theory Wellness — Columbus	3905 Sullivant Avenue, Columbus, Ohio 43228	Columbus	48	0	48	Apr 16–17, 2026	
TOTALS (All 30 Locations)				2,174	380	2,554		

Summary — 70.1%–77% THC Range (All 30 Locations)

Vaporizer SKUs in 70.1–77% THC Range (23 locations with split data)	2,174
Concentrate SKUs in 70.1–77% THC Range (23 locations with split data)	380
Total SKUs in 70.1–77% THC Range (All 30 Locations)	2,554
Locations with confirmed data	30 of 30
Locations with vape/concentrate breakdown	23 of 30 (7 Columbus/London reported as combined totals)

When combined with the findings documented in Appendix A (products exceeding 77% THC), the data above demonstrates that Ohio licensed dispensaries are actively advertising a substantial volume of high-potency cannabis products across both threshold ranges. The 70.1%–77% range products documented here represent products that exceed the statutory threshold, illustrating the breadth of high-potency inventory being marketed to consumers at these locations in excess of the 70% potency limit established in SB 56. Of note, Ascend Dispensary (Cincinnati) was observed actively promoting products in both the 70.1– 77% and above-77% THC ranges as 'New This Week,' suggesting ongoing procurement and promotion of high-potency products above the legal potency limit rather than legacy inventory management from prior to the effective date of SB 56 on March 20th, 2026 when higher potencies were legal.

APPENDIX D

Follow-Up Compliance Sweep — All 210 Ohio Dispensaries

Sweep Date: May 18–21, 2026 | Investigators: Nolan F., Sheila B., Angel M. | Total Locations: 210 | Violations: 210 (100%)

The table below documents the results of the follow-up online compliance sweep conducted approximately seven weeks after the effective date of Ohio's THC potency law. Investigators visited each dispensary's publicly accessible online menu, identified the single highest-potency product listed, and captured a timestamped screenshot. All 210 locations were found to be advertising at least one product exceeding the statutory 70% THC limit.

210 Locations Swept		210 Violations (100%)		0 Compliant (0%)		89.7% Avg. Highest THC
